DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 7, are rejected under 35 U.S.C. 102(b) as being anticipated by Jackson.

Regarding claim 1, Jackson discloses a system for testing a printed circuit board with features of the claimed invention including an apparatus (multi-probe test fixture) mounted on the circuit board a high speed test signal acting as amplifier, a multiplexing along with test signal transmitting means acting as a signal conditioning (see claim 1).

Regarding claim 7, Jackson shows plurality of capacitors and resistors in various components of his system (see figure 2).

3. Claims 2-6 and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 10-20 are allowed for the provision of a strain indicator embedded in the circuit board, or the provision of identifying the large of amount of strain by vibration analysis, along with other limitations.
